DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 16, 2007 has been entered.

Response to Amendment

2. As a result of the amendment to the claims, the rejection of claim 10 under 35 U.S.C. 112, first paragraph has been withdrawn.
3. As a result of the amendment to the claims, the rejection of claim 1-5, 8-15 and 41-44 under 35 U.S.C. 112, first paragraph has been withdrawn.
4. As a result of the cancellation of claims 41-44, the rejection under 35 U.S.C. 112, second paragraph has been withdrawn. Additionally, as a result of the

Art Unit: 1761

cancellation of claims 41-44, the provisional rejection of these claims on the ground of nonstatutory obviousness-type double patenting has been withdrawn.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 1-5 and 10-15 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Elder et al. (US 20040058054). The rejection and Examiner arguments are taken as cited in the previous Office Action, mailed January 17, 2007.

Double Patenting

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 1-5 and 10-15 remain provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-32 and 42-50 of copending Application No. 10/606137.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 1761

10. Claims 11-15 remain rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6989167. This rejection had previously been made over claims 1-14 of copending Application No. 10/603978, which has now been issued as U.S. Patent No. 6989167. Nevertheless, the rejection is taken as previously cited under the provisional double patenting rejection of record.

Response to Arguments

11. The Examiner notes that in the remarks, Applicant has indicated that at the time of the final disposition of the pending claims is determined appropriate Terminal Disclaimers can be filed. The Examiner asserts however that until a Terminal Disclaimer is filed the rejections remain pending and thus have been maintained for the reasons of record.
12. The declaration filed on April 16, 2007 under 37 CFR 1.131 has been considered but is ineffective to overcome the Elder et al. reference.

In this case, the affidavit is directed to Application No. 10/606137 and not to the instant application. This is further shown in paragraphs 28 and 30, on pages 5 and 6, which are directed to claims 1 and 10 of Application 10/606137. Corrections are required that would clearly establish the invention of the instant

application prior to the effective date of the reference upon which the rejection is based.

Furthermore, the Elder et al. (US 2004/0058054 - now U.S. Patent No. 7037540) reference is a U.S. patent or U.S. patent application publication of a pending or patented application that claims the rejected invention. The Examiner directs Applicant specifically to instant claim 10 on which the Elder et al. reference claims the rejected invention. An affidavit or declaration is inappropriate under 37 CFR 1.131(a) when the reference is claiming the same patentable invention, see MPEP § 2300. If the reference and this application are not commonly owned, the reference can only be overcome by establishing priority of invention through interference proceedings. See MPEP Chapter 2300 for information on initiating interference proceedings. If the reference and this application are commonly owned, the reference may be disqualified as prior art by an affidavit or declaration under 37 CFR 1.130. See MPEP § 718.
